

Join us in Rebuilding Ukraine and winning the peace! Let's build a stronger future for Ukraine together

Our Mission is to evaluate, educate, supply,
and train veterans, engineers, architects,
construction managers, and employees of
Ukraine's national and regional governments
and businesses.

We will assist them in planning and designing
the construction of housing, agricultural
buildings, hospitals, schools, commercial and
industrial buildings, and infrastructure using
new products and building methods,
transferring knowledge and know-how to
future generations.

Construction Project Manager Apprentice Training and Project Manager Professional (PMP) Certification Program

Building a Skilled Workforce for Ukraine's Reconstruction

Ukraine's reconstruction

This massive undertaking requires **skilled project managers** to oversee complex infrastructure and rebuilding efforts. Effective project management ensures that resources are used efficiently, projects are completed on time, and reconstruction efforts meet international standards. However, Ukraine faces a severe shortage of trained professionals in this critical field.

This initiative combines

Technical training, industry mentorship, and workforce integration to create a highly skilled workforce capable of leading Ukraine's reconstruction efforts. Rebuilding Ukraine Association Inc. (RUAI) will work in **close collaboration with the Ukrainian Veterans Administration** to ensure that **military veterans receive priority access** to training programs. Through **donations and industry-sponsored apprenticeships**, we aim to offer veterans a high percentage of training opportunities free of charge.

Our Established Partners

RUAI's partners include the Univ. of Florida Rinker School of Construction Management, the Ukrainian Association of Builders, the Ukrainian State Special Transport Services, the Ukrainian Ministry of Veterans Affairs, the US Army Corps of Engineers, Kyiv National Univ. of Construction and Architecture and several others.

Phase 1: Pilot Program (Months 3-6)

A **small-scale pilot** will train **30 to 40 participants** from the Ukrainian State Special Transport Service (SSTS) and the Ministry of Veterans Affairs. This 20-hour training integrates:

- ✓ **Industry Best Practices** – Training aligned with global project management standards.
- ✓ **Kahua Software** – Hands-on experience with digital project management tools.
- ✓ **Mentorship from U.S. & EU Professionals** – Direct guidance from industry experts.
- ✓ **Real-World Application** – Practical skills for immediate workforce impact.

This pilot will refine the curriculum before full-scale deployment.

Phase 2: Regional Rollout (Months 6-24)

- ✓ Expanding to 1,500 trainees through an online and hybrid learning model.
- ✓ Establishing a Kyiv-based office with dedicated full-time staff for program management.
- ✓ Developing a PMP Certification Program in partnership with the University of Florida's M.E. Rinker, Sr. School of Construction Management, aligning with Project Management Institute (PMI) standards.
- ✓ Providing Scholarships for veterans, ensuring broad accessibility to training.

Phase 3: Nationwide Expansion (Years 2-5)

- ✓ Scaling to 10,000+ trainees across Ukraine.
- ✓ Institutionalizing project management education within universities and industry programs.
- ✓ Creating a national certification database for job placement and credential verification.

The program will establish

A **fully operational office in Kyiv**, staffed with **three full-time administrators** and an **IT team** to manage training logistics, mentorship programs, and certification tracking.

Additionally, **one full-time staffer based in the U.S.** will support fundraising, partnership development, and program administration.

We invite engineering and construction firms to partner with us in rebuilding Ukraine!

Join our program through mentorship, apprenticeships, scholarships, and industry partnerships. Your expertise and investment can help train the next generation of project managers, ensuring Ukraine's reconstruction is efficient, transparent, and sustainable.
